# Senior
Data Scientist

Eager to take the lead on data-centric projects and steer a team in the right direction? As one of the fastest growing Belgian advanced analytics & AI agencies, we are looking to hire senior data scientists. Be part of this journey, send us your CV and motivation letter!

About Crunch Analytics

Crunch Analytics is a service company based in Ghent that helps companies thrive in a new era of decision-making, driven by advanced analytics and artificial intelligence. Our three key pillars support this objective:

Pillar 1: Data strategy

We assist companies in understanding what they can do with that, what data strategy and infrastructure is needed and what impact to expect.

Pillar 2: Advanced Analytics & AI

We build tools that help decision-makers to better understand what happened, why it happened, predict what will happen, anticipate and automate decision-making.

Pillar 3: Training

We educate both decision-makers and their teams on the opportunities for advanced analytics & AI.

We are proud to serve some of the most innovative players in Retail, Technology, and Horticulture. Which means that experience in any of these sectors could be of great use!

About the position

Crunch Analytics is looking for candidates eager to work in a challenging, international business environment with companies looking to transform their organisation. We bring together people that are keen on applying the latest technologies and techniques in fields such as data science, machine learning & AI. Their work is guided by one sole mantra: "Is this providing additional business value?".

We are looking for experienced data scientists, who have successfully completed challenging projects in advanced analytics and artificial intelligence. A successful candidate has the ambition to act as a trusted advisor for companies eager to use data & algorithms in assisting people when making business decisions and allowing systems to automate such decision-making.

Key responsibilities

As a Senior Data Scientist, you will take the lead on data-centric projects in various industries, such as retail, horticulture and manufacturing. Projects might involve topics such as price optimization, demand forecasting or customer behaviour.

Your excellent programming skills, data science knowledge and business acumen allow you to identify opportunities at a client, define the scope and execution strategy of a project and steer a team, moving along the journey.

You complement such technical & business skills with the ability to communicate your findings in a way that is easy to understand for clients. You will act as a tutor in your domain of expertise and be responsible for mentoring junior profiles.

Your profile

- You have 3+ years of experience working as a Data Scientist
- You have a BS or MS in Computer Science, Business or Civil Engineering, Business Administration, Economics, AI, Data or Marketing Analysis, Maths, or Statistics
- You are eager to learn new things
- You are fluent in Dutch and English and are a good communicator
- You are flexible and stress-resistant
- You like going out of your comfort zone

Are you ready to become part of a young and ambitious team that is eager to learn and not afraid to take on a challenge? Let's talk!

Requirements

- A track record of multiple advanced analytics and AI projects in various industries within a business context
- Excellent Software Engineering skills
- Expert in every aspect of Data Science
- Excellent communication skills. This includes written, oral and non-verbal communication.
- A team player and mentor for more junior team members.
- Willingness to tutor others about Data Science and your area of expertise
- Able to collaborate with and mentor Junior Data Scientists, and give (non-) technical advice and direction.
- Experience in project and account management
- Capable of defining the scope and execution strategy for new projects

Our offer

We offer a vibrant working atmosphere with a true scale-up mentality at our office in the Rodelijvekensstraat 28 in the center of Ghent. More than anything you will be given the opportunity to take the initiative to set this company on the map, as well as the opportunity to keep learning and growing over time. Since you operate in a startup environment you are unafraid of taking initiative and ownership of projects, but you can of course count on the full support and teaching of our other team members.

We always appreciate it when you let us know why you want to work for Crunch Analytics exactly!
